Led by EARTHDAY.ORG in
collaboration with partners
worldwide

EARTHDAY.ORG along with lead organizers Education International, Hip Hop Caucus, and Earth Uprising are organizing three separate parallel climate action summits on April 20 & 21 ahead of the Biden Administration's global leaders' climate summit. The parallel summits are focused respectively on climate literacy, environmental justice, and a broad range of youth-led climate-focused issues. Earth Week will also bring thousands of groups and millions of voices together to stand up for climate action and bring awareness to humanity's greatest existential threat.

Earth Day's 2021 theme, Restore Our Earth, focuses on natural processes, emerging green technologies, and innovative thinking that can restore the world's ecosystems.

EARTHDAY.ORG's Earth Day Live Restore Our Earth digital event will take place on April 22, 2021 from 12PM ET- 4PM ET and will include world climate leaders, grassroots activists, nonprofit innovators, thought leaders, industry leaders, artists, musicians, celebrities, and more.
