## ABOUT THE VIRTUAL BRIEFING

Join Hispanic Access' Olay y Acción (OyA) Ocean Advisory Council for an interactive presentation featuring our newly released Ocean & Coastal Protection Toolkit. The toolkit will provide a deeper look into the processes of nominating important cultural sites for preservation and will elevate the importance of protecting these sites for Latino communities through site-specific case studies. Following the toolkit introduction, OyA members will guide our panel of distinguished guest speakers through a discussion. Each of our panelists is actively working on or has worked on campaigns for preserving heritage sites on the ocean and coast in their own local communities.
